

Diamond-D03 Portable Hard Drive Specification

The firmware update tool is for the transfer speed slower problem when users try to transfer 5GB (1000 folders/36000 files) into Diamond D03 hard drive.

The following step of updating F/W as below:

1. Please try to download Diamond D03 PHD Firmware Update Tool from our website
2. Please save this file first and then unzip it.
3. Please plug in the Diamond D03
4. Launch the utility as below:

[SiliconPower PHD D03]1053FWUpgrade_120416_11_1B_04_V1.exe 262 KB 應用程式 2013/2/27 下午 04:02

5. After updating F/W successfully, the Status message will pop up as below: Please press “OK”

6. Please safely remove the hard drive.

7. Please re-plug in the Diamond D03 hard drive, the firmware update process has been updated successfully.
