

Overcome Extremes With XPOWER

Overcome Adversity with XPOWER

Render in higher resolutions. Witness realistic pictures and smooth transitions. End choppy animation and catastrophic lag. Handle complex tasks with ease. Browse unlimited tabs and multitask like a pro. Do what you love faster with confidence. Sound like a dream? The new XPOWER Turbine DDR4 makes it all come true. This high-quality RAM features thrilling speeds of up to 3600MT/s with an operating voltage of 1.2V-1.35V. Designed to support the most dedicated gamers and modders, the XPOWER Turbine DDR4 is the premier choice if you want a powerful and affordable memory upgrade.

Luck Favors The Cool

The XPOWER Turbine DDR4 combines aesthetics and performance with compatibility to avoid installation and support anxiety. The Turbine's been 100% tested for stability, durability, and compatibility in a range of rigs. All its power is packed into a small size and its 10-layer PCBs ensure excellent stability. The XPOWER Turbine meets Intel® Extreme Memory Profile (Intel® XMP) Standards. Now, maximizing your computer speed is easier and more accessible. Push beyond the limits. Once the Turbine is installed, it's finally your time to shine. A cool blue heat sink keeps your memory module safe from overheating meltdowns.

Gaming Memory Module

Features

- Authentic and high quality SP memory module
- 100% tested for stability, durability, and compatibility
- Dynamic thermal heatsink mechanism to prevent overheating
- Supports Intel® Extreme Memory Profile (Intel® XMP) Standards
- Up to 10-layer PCBs to ensure stability and reliability
- Supports Intel Coffee Lake Processors

Specifications

- Capacity: Single Pack - 8GB, 16GB
Dual Channel Kit - 16GB (8GBx2), 32GB (16GBx2)
- Form Factor: 288Pin UDIMM
- Frequency (Speed): 2666/3200/3600 MT/s
- CAS Latency: CL16(2666)/CL16(3200)/CL19(3600)
- Voltage: 1.2V(2666)/1.35V(3200)/1.35V(3600)
- Warranty: Lifetime warranty
