A person wearing a backpack and holding a camera with a long lens is standing on a mountain peak. The background features jagged mountain peaks under a bright, cloudy sky with the sun low on the horizon, creating a warm, golden light. The person is wearing a red long-sleeved shirt and dark pants. The camera is a black DSLR with a large telephoto lens and a lens cap.

CAPTURE EVERY WONDERFUL MOMENT

— GET ALL THE DETAILS

Riveting Memories, Powering your Creativity

CFexpress and CFast are new high-performance memory card formats designed for professional photographers and videographers. Whether you are an early adopter embracing the lightning-fast capabilities of CFexpress or a seasoned expert relying on the proven track record of CFast, both options offer unparalleled potential.

- High Speed

Utilizes PCIe, NVMe interface offering theoretical transfer speeds of up to 1800MB/s.
- Future Proof

Compatible with XQD card slots, allowing many high-end cameras to use it with a firmware update.
- Durability

Highly resistant to extreme conditions like temperature, shock, and vibration.
- Reliable

Has built-in error correction code (ECC) functionality.
Compact: Small size makes it suitable for portable devices.
- Compatibility

Widely adopted by professional photography and video products.

CFexpress Card

We Keep Your Memory Fresh, More Secure than You Do

SD and microSD cards share the same standards and operate in the same manner. They are excellent options for photographers. Depending on your camera and device, Silicon Power provides both types, and you might find a microSD card more suitable for compact or mobile devices.

High Speed Options

microSD cards under the UHS-I/UHS-II and V60/V30 standards can handle high-speed photography and video recording.

Compatibility

Widely supported in a range of camera models, especially DSLR and mirrorless cameras.

Durability

Comes with features like shockproof, waterproof, and x-ray proof.

Capacity

Available in larger capacities (SDHC up to 32GB, SDXC up to 1TB), suitable for high-resolution photography.

Literally the Only Thing You Need for All Your Gear

This card reader and docking station serves as a perfect companion for your memory card and various electronic devices. Not only is it compact, but it also eliminates the need for carrying numerous adapters, preventing your bag from getting filled up.

- High Speed** | Featuring a USB 3.2 Gen 1 interface for swift data transfers.
- Simplicity** | Read and write on multiple cards simultaneously even without a need of a external power source.
- Compatibility** | Supports popular memory formats like SD, microSD, MMC, CF, and MS.
